ENVIRONMENTAL POLICY STATEMENT

ENKA is committed to identifying, eliminating and minimising the environmental impact which may arise from its construction activities in all countries of operation.

Starting from business development through to tendering, engineering, mobilisation, construction/commissioning, demobilisation and reinstatement stages, all activities are to be performed with due consideration for the environment.

The senior leaders at ENKA provide all necessary resources to establish and implement Environmental Management Systems by assigning responsibilities to key individuals and fostering environmental awareness amongst all personnel.

To this end;

- Complying with the environmental laws and regulations applicable in the countries of operation, and other requirements associated with environmental aspects of our activities,
- Using natural resources economically,
- Mitigating environmental impacts through effective waste management,
- Reducing the risks of emergency,
- Fostering environmental awareness of all employees,
- Meeting the requirements of ISO 14001 Environmental Management System and providing the necessary resources,

are the key principles and objectives of this policy.

All our employees are responsible for supporting and assisting the, implementation and continual improvement of Environmental Management System.

Mehmet TARA

President and Chairman of the Executive Committee
